DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 21-32 and 48-54, drawn to a wafer prober for probing a semiconductor wafer.

Group II, claim(s) 33-47 and 55-57, drawn to wafer prober for probing a semiconductor wafer.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

- 1) Wafer Prober of Group I, wherein ceramic substrate comprises at least one selected from the group consisting of nitride ceramics, carbide ceramics and oxide ceramics. Wafer Prober of Group II does not require ceramic substrate comprises at least one selected from the group consisting of nitride ceramics, carbide ceramics and oxide ceramics.
- 2) Wafer Prober of Group II, wherein one conductor layer formed inside ceramic substrate. Wafer Prober of Group I does not require one conductor layer formed inside

ceramic substrate.

Group I and Group II have different technical features as mentioned above.

A telephone call was made to Mr. Sachar on 08/25/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
